

Brendan Manseung Choi

AI Engineer | Full-Stack Developer

Auckland, New Zealand | brendanchoi0626@gmail.com | +64 22 036 8384 LinkedIn: linkedin.com/in/manseung-choi-0447b4223 | GitHub: github.com/mcho868 | Portfolio: manseungchoi.com

PROFESSIONAL OBJECTIVE

Actively seeking full-time, stable employment in Software Engineering / AI Development. A highly driven Computer Science graduate (First Class Honours) building advanced freelance and portfolio projects to maintain sharp technical skills while aggressively pursuing full-time industry roles.

EDUCATION

Bachelor of Science (Honours, First Class Honours) in Computer Science University of Auckland | Feb 2022 - Dec 2025 | GPA: 8 / 9

- University of Auckland Postgraduate Honours / PGDip Scholar

PROFESSIONAL EXPERIENCE & FREELANCE PROJECTS

Freelance AI Engineer (Portfolio Project) | AIvolve (AI Voice Agent Project) | Dec 2025 - Present

- Designed and implemented an AI voice agent for inbound calls, lead qualification, and automated job booking using LLM-based intent parsing and calendar APIs
- Built end-to-end call handling workflows (speech -> intent -> scheduling -> CRM sync) to showcase production-level engineering skills

Lead Developer (Project-Based) | Align Health Tech (Clinical Automation Project) | Oct 2025 - Present

- Designed and implemented AI-driven clinical workflow automation prototypes, integrating with mocked Practice Management Systems
- Built automated patient summarisation and referral generation pipelines to demonstrate technical capability in healthcare tech
- Awarded NZD \$15K Velocity Challenge grant based on technical prototype excellence

Research Assistant (AI-Based Web Development) | University of Auckland | Dec 2024 - 2025

- Built an AI-powered course assistant using GPT-based NLP, TTS voice synthesis, and an avatar-based React frontend
- Designed conversational interfaces to replace static course information pages
- Awarded 2nd Place, COMPSCI 399 Capstone Competition (2024)

SELECTED PROJECTS

Plain Rights - Legal Document Simplification (*1st Place out of 12 teams, University of Auckland Legal Tech Hackathon - Student Competition*)

- Built a RAG pipeline translating complex legal contracts into verified plain-English summaries

Honours Dissertation - On-Device Medical Triage with Compact LLMs

- Achieved **70.4% triage accuracy** with **2.4s end-to-end latency** on retail consumer device using an on-device RAG system
- Built with quantized SmolLM2 (135M-360M) and LoRA fine-tuning on 13,825 synthetic triage cases

Pomocoin - Gamified Productivity App (iOS Beta)

- Built a React Native productivity app with offline support, subscriptions, and reward-based gamification

TECHNICAL SKILLS

- **Coding language:** Python, TypeScript, JavaScript, SQL, Java, C#
- **AI / ML:** RAG, LoRA fine-tuning, quantization (4-bit / 8-bit), LLM APIs (OpenAI, Gemini), local inference (Ollama)
- **Web / Mobile:** React, React Native, Next.js, Django, Flask, Express.js, Tailwind CSS
- **Databases:** Firebase, MySQL, SQLite
- **Cloud / Infra:** AWS
- **Tools:** Git, Jira, VS Code (2 published extensions), Cursor

ADDITIONAL ACHIEVEMENTS

- Published 2 VS Code extensions (LOCAI, File Star) to the Marketplace
